For a quick reading

1-1. INDEX OF THE COMMAND ELEMENTS

a) Remote control keys

Under the cover

Symbol	Function
	Program key
	Programming: FF and REW search keys
	Programming: Memory key
	Programming: TV norm, no function on this unit
C...	Programming: zero adjustment, set the search unit at the beginning of the VHF frequency band
MEM	"Intelligent" remote control: memory/function indication
VIDEO 1/2/3 MDP	"Intelligent" remote control: commutator for supplementary units
PROGR + / -	"Intelligent" remote control: program change of the video/MDP unit
	"Intelligent" remote control: function keys for video/MDP unit
●, II, 	
RESET	"Intelligent" remote control: cancelling of the memorized functions

Basic functions

Symbol	Function
	Image-in-the-image: program index, switches all the non-cancelled index program places and all the data sequentially.
	Image-in-the-image: program index, switches the 4 small images memorized sequentially.
	Image-in-the-image: "freezing" of the small image.
	Image-in-the-image: stroboscopic effect at 4 different speeds.
	Image-in-the-image: switching of the big and the small image.
	Image-in-the-image: the respective switching of the image which follows the actual one takes place in various small images.
	Image-in-the-image: Insertion of the image in the image. Only selectable up to 4 small images.
	Image-in-the-image: size increase of the small image.
	Activation/disactivation of the sound.
DEMO	A list of image-in-the-imagefunction is represented successively (only if you have not activated the image-in-the-imagefunction).
	Image-in-the-image: the small images repeats successively 4 memorized images of the main image (only if the image-in-the-image function has not been activated).
	Image-in-the-image: modification of the position of the small image/images.
	Image-in-the-image: modification of the colours of the frame of the small image.
	Image-in-the-image: disactivation of the image in the image.
	Brief disactivation of the unit (standby mode)
1, 2...9, 0,	Number keys, program selection and disactivation of the standby mode of the unit; for those program numbers that consist of two positions, first press the key and then the number.
+ 1, 2...9, 0,	Image-in-the-image: program selection of the small image.
	Key for selecting the desired input.
	Image-in-the-image: selection of the desired image in the small image.
	TV key: switches the unit from any operation mode to the TV mode.
	Key for selecting the output signals 2/ .
A/B	Bilingual transmission: for selecting the desired channel.
	Activation/disactivation of the tone adjustment (increase of treble and bass).
	Insertion keys: for inserting information on the screen.
C	For the direct selection of the channel in the TV mode without using the memory function.
	Activation/disactivation of the spacial sound setting.
	Hour Key Activation/disactivation (only for having the televideo on the selected channel).
	Works only in combination with another key.
	Image and sound adjustment.
	Key for returning to the initial values of the image and sound settings.
	Volume up/down
PROGR + / -	Program selection forward/backward

The colour keys are destined for the televideo.

b) Keys and connections of the unit

Front vision of the unit

Symbol	Function
	Earphones jack
	Video S input jack
	Video input (yellow)
	Audio inputs (white and red)
	Selection key
	P: Program switching
	Volume
	Video input mode
A/B	Indications of two channels/stereo
	Standby indicator
	Infrared remote control sensor
	Power switch, activation/disactivation of the unit

Rear vision of the unit

Symbol	Function
	Connection jacks for external loudspeakers.
	Audio outputs (cinch jacks)
	Y/C input and video/audio input (cinch jacks)
	21 pin EURO-AV connection (with Y/C input)
	21 pin EURO-AV connection (with RGB input)
DX/Local	Antenna attenuator
	Antenna socket

Channel tuning

Use the remote control keys for tuning the channels. The remote control houses 60 programmable memory sections (00-59).

There are two ways in which to perform the adjustment:

a) Direct channel setting

The desired channel number is known and can be directly introduced.

- 1) Turn the unit on using the power switch .
- 2) Press the program key . The program number will flash on the on-screen display.

- 3) Select the desired program place using the number keys or the PROGR + / - keys. As for program numbers that consist of two positions, first press the key and then the program number.

- 4) Press the C key. The "C" indicator will flash on the display together with two lines to indicate the channel number. Digit the two numbers of the desired channel using the number keys (e.g. 04 for channel 4). If the desired channel is a cable channel, press the C key twice. The "S" indicator will flash on the display together with two lines to indicate the channel number. Digit the channel number according to the previous description.

- 5) If the channel is to be memorized, press the memory key . Now, the program number no longer flashes. Is the channel is not to be memorized, repeat the sequence from item 2.
- 6) Repeat the operation from item 2 if you want to memorize other channels.

b) Automatic channel search

The TV set automatically searches those channels that can be received in your area (in the case of cable channels, also the respective cable channels).

- 1) See "Direct channel setting".
- 2) See "Direct channel setting".
- 3) See "Direct channel setting".
- 4) Activate the automatic search using the + or - keys. "+" to advance the number (higher frequencies) "-" to decrease the number (lower frequencies) Using the C key, the search system returns to the beginning of the VHF frequency band.
- 5) If you want to memorize the tuned channel, press the memory key . If you do not wish to memorize the channel, repeat the memorizing operation from item 4.
- 6) If you want to memorize other channels, repeat the operation from item 2.

Note:
Press the key again to leave the programming mode without memorizing any channel.

1-2. SUPPLEMENTARY FUNCTIONS

- 5) Press the memory key $\diamond$ to memorize the channel name.

b) Cancelling the undesired program positions

Thanks to the C key, your unit offers the possibility to cancel the program positions in which you have not memorized any channel during the passage with the PROGR keys.

- 1) Press the program key $\rightarrow$.
- 2) Select the program position that is to be cancelled using the number keys or the PROGR + / - keys.
- 3) Press the C key.
- 4) Press the memory key $\diamond$ to leave the programming mode. The cancelled program positions can still be recalled using the number keys.

a) Individual assignation of the program name

Your new Sony TV set offers you the possibility to assign individual names to the memorized programs. This name will appear in the top right corner of the screen for a short while every time that you turn the TV set on or when you change program.

- 1) Select the program to which you wish to assign a name, using the number keys.
- 2) Press the program key $\rightarrow$.

- 3) Press the $\oplus$ key. Use the + or - key to select the first letter of the name (number or letter: 0-9, A-Z, - for empty space).

- 4) Press the $\oplus$ key again. The indication will skip to the next position, which is to be digitized as the first one. In this way, you can set the five letters of the channel name.

c) Manual fine tuning

If you have memorized a channel, the reception of which is not optimal, the automatic fine tuning might be deactivated. In this case, press the $\boxminus$ - or + keys. If the channel is recalled again using the correct program number, the automatic fine tuning will start again.

d) Direct channel selection in the TV mode without memorizing the channels

In the normal TV mode, you have the possibility of recalling other channels without memorizing them. The recalled channel will then be cancelled when you change program or when you turn the unit off.

- 1) You are watching a TV program. If you want to select a channel directly, press the C key (for cable channels, press the key twice).
- 2) Digit the two figures of the channel number (e.g. 02 for channel 2).

Usage of the TV set

1-3. BASIC FUNCTIONS

The remote control is the central control unit of your TV set, with which all the command functions are performed. The unit contains an infrared sensor $\square$ that receives the remote control signals. The most important functions can also be operated directly on the command section of the unit itself.

- **Activation and disactivation**
Activate and deactivate the TV set pressing the power switch $\odot$ on the unit.

- **Standby mode**
If you deactivate the unit for a short while only, you can do so using the standby key $\odot$ of the remote control. The unit will then stay in the standby mode and you can activate the TV set pressing any number key or the TV $\square$ key. When the unit is in the standby mode, the $\odot$ indicator will light on the unit.

- **Program selection**
 - a) Using the number keys 1, 2...9, 0.
For selecting programs that consists of two numbers, first press the $\swarrow$ key and then the number keys.
 - b) Using the program passage keys PROGR + / - .
+ : Higher program numbers
- : Lower program numbers
 - c) Using the panel of the unit itself.
Press the program passage keys - / + .

- **Informative indication on the screen**
If you press the display key $\square$, the various information indications will appear briefly on the screen. If you press the key again, the number and the name of the program will remain visualized on the screen until you press the key another two times.

- **Switching of the signals of a connected**
Unit press the $\odot$ key on the remote control until you see the desired symbol appear on the screen:

In connection with this, see "Connection of other units".

To open the cover, press the countersign with the arrow.

- **Modification of the Image and sound adjustments**
The modifications will be visualized on a scale on the screen.

Volume

Using the + key , the sound will be recorded at a higher volume level. Using the - key , the sound will be recorded at a lower volume level.

On the unit itself:

Use the P key $P \rightarrow \triangle \rightarrow \ominus$ to select the volume $\triangle$ and to memorized the desired volume level with the $+/-$ keys.

For all the other corrections of the image and sound
Select the function that you wish to modify first with the  key:
① contrast, ② colour, ✱ brightness, ③ colour shade (for NTSC), ④ bass, ⑤ treble and ⑥ balance.

Thereafter, record the desired value with the + or - key.
If the normal values that have been memorized in the factory are to be cancelled, press the → • ← key on the remote control and press the - and + keys on the unit simultaneously.

- **Sonic playback type**
Stereo transmissions

During the reception of stereo transmissions, the two indicators A/B will light on the unit.

Transmissions that are broadcast over two channels

For the reception of transmissions that are broadcast over two channels (when the transmission is broadcast in two languages), the desired channel can be selected using the A/B key on the remote control. In case you choose channel A (synchronisation), the A Indicator will light on the unit, whereas if you choose channel B (original tone), the B Indicator will light. The individual selection of the sound can also be performed while using the earphones or the videorecorder (with the A/V jacks).

Spacial sound/tone adjustment

Use the  key on the remote control to activate and deactivate the spacial sound ( or  indication on the screen).

Use the **u** key on the remote control to activate and deactivate the tone adjustment (increase of bass and treble). (**u** or **u** indication on the screen.)

- **Sound disactivation**
Press the  key on the remote control to disactivate the sound of the TV set and reactivate it pressing the same key again.
- **Time indication**
If teletext is broadcast on the selected channel, press the  key on the remote control to visualize the time indication on the screen. Press the same key again to cancel the time indication.

1-4. SPECIAL FUNCTION

a) Image-in-the-image

With the image-in-the-image function, you have the possibility of inserting up to four small images in the image of the TV program so as to visualize other channels or video sources without switching the program.

- Insertion and elimination of the small image

The small image will appear in the upper left corner of the screen.

Press the  key (you can choose four small images pressing the key repeatedly).

Press the key to cancel the operation.

Small image

- Program selection of the small image

- Insert the small image.
- Press the $\uparrow$ key (the $\uparrow$ symbol will appear in the lower left corner of the screen). Select the desired program for the first small image using the number keys. Repeat the a) and b) operations for every other small image.
- Select the program with the number keys or the PROG $\pm$ key.

- **Programming of four small images**

Using the  key you can insert up to four small images. The programs for the small images can be recorded in the following way:

- a) Press the  key.
b) Press the  key (the  symbol will appear in the lower left corner of the screen). Select the desired program for the first small image using the number keys. Repeat steps a) and b) for the other small images.

Select the position pressing the key. There are four possibilities for inserting a small image:

- Inserting the small image (key).
- Press the key.

The small image is "frozen".

- Insert the small image (⌘ key).
- Press the ⌘ key.

Press the same key again to deactivate the function.

Four fixed memorized images will be repeated in the main image.
Press the key.
Press the same key again to deactivate the function.

All the program positions that have not been cancelled and all the video inputs will be connected sequentially. Press the key. Press the key to disactivate the function.

The four memorized programs of the small image are automatically up-dated sequentially.

- Press the **↑** key.
- Press the **⏮** key.
- Press the **⏭** key to disactivate the function.

Now, a selection of image-in-the-image function will appear automatically on the screen.
Press the **ESC** key to cancel the function.

- a) Insert the small image.
- b) Press the key.
- c) Press the key.

Repeat the operation from item b) to disactivate the function.

To insert more small images, the updating can be performed as follows:

- a) Press the **↑** key.
- b) Press the **Ⓜ** key.

Now the following small image will be updated.

With this effect, the movements of the small image can be represented in snapshots at four different speeds.

- a) Insertion of the small image.
- b) Press the $\uparrow$ key.
- c) Press the $\otimes$ key.

Repeat the b) and c) of stroboscopic speed is recorded deactivate the function.

- Insert the small image (key).
- Press the key.
- Press the key.

The last AV connection used will be inserted. For the selection of another input, repeat the b) and c) operations until the desired input is indicated. Press the key to deactivate the function.

a) Insert the small image (key).
b) Press the key.
c) Press the key.
Repeat points b) and c) until the desired colour appears on the frame.
(Blue-black-white-yellow-cyan-green-pink-red)

1-5. INTELLIGENT REMOTE CONTROL

Using the remote control of your Sony unit, you have the possibility of controlling up to four audio and video units with the advantage that you can operate various units using one remote control.

1) Usage of the Sony video tape recorders/video disc players

For the majority of the Sony video tape recorders/video disc players, you can use the remote control without programming the functions. Switch the VIDEO 1/2/3/MDP in the desired position to do so.

Video 1: Video tape recorder Sony 2 Betamax and Sony VHS FLV 202

Video 2: Video tape recorder Sony 8 mm

Video 3: Video tape recorder VHS Sony

MDP: Sony video disc player
(also multiple video disc player)

After having selected the desired unit, you have the subsequent functions at your disposal:

- ◀ Fast backward
- ▶ Playback
- ▶▶ Fast forward
- Stop
- Recording
- ⏻ Activation/disactivation of the unit
- ⏸ Pause

2) Controlling units of other brands

The remote control of your unit can memorize the functions of other remote controls. You can memorize one function on each of the programmable keys.

a) Switch the USE/MEM key to the MEM position (memorize).

Rear vision

b) Switch the VIDEO 1/2/3/MDP switch to the desired position (independently of the type of the supplementary unit)

c) Put the remote control of the supplementary unit at a distance of about 5 cm from the remote control of the TV set. / Do not move the remote controls during the programming.

d) Press the programmable key on which you wish to memorize the function and press simultaneously the key on the remote control of the supplementary unit containing the function to memorize. Press the keys until the MEM indicator turns off. If you have pressed a key, the function of which can be memorized, the MEM indication will flash eight times, after which it will turn off.

e) Repeat items 2 and 4 for each other function to memorize.

f) Switch the USE/MEM switch to the USE position (remote control).

Advice

- For products of other brands, switch the VIDEO 1/2/3/MDP to the position that is not used for the Sony units.
- For the usage of a supplementary unit, the VIDEO 1/2/3/MDP must be in the position in which it was during the memorizing.
- In order to facilitate the usage, the new functions are memorized on the relative keys on the remote control RM 811 (e.g. playback of the video tape recorder on the playback key ▶).
- You can also memorize functions of audio units.

Warnings

- If you change the batteries of the remote control, the functions will stay memorized for about 30 minutes.
- After the memorization, control the memorized function, since it might happen with units of other brands that some of the functions are not accepted.
- If the memory is full, the MEM indicator will light.

Cancellation of the memorized functions

- 1) Switch the USE/MEM switch to the MEM position.
- 2) Switch the VIDEO 1/2/3/MDP to the position of the desired unit.
- 3) Press the RESET key with a pointed object (e.g. a ballpoint pen). Now, all the functions are cancelled. The MEM Indicator will illuminate briefly, after which it will turn off. The functions which control the supplementary Sony units will still remain memorized.

1-6. TELETEXT

Your Sony TV set has been equipped with a decoder for teletext signals. The keys have been countersigned in green on the remote control. Teletext is an information service which is furnished without any charge from the TV companies. In order to switch the teletext reception to another channel, you must first return to the TV mode and select another channel.

Recalling the teletext

- Select the desired channel using the number keys.
- Press the  key.
If the teletext is broadcast, the index page will be visualized on the screen. If not, the indication P100 will appear in the upper corner of the screen. Press the  key again to insert the TV image in the background added to the teletext image.

Returning to the TV mode

Press the  key to exit from the teletext mode and to return to the normal TV mode.

• Selecting the pages

Digit the three figures of the desired page using the number keys. If you were to make an erroneous sequence, complete the three figures of the number and then digit the correct number. Now, the page counter of the teletext will search the page until it is found, after which the page will be visualized on the screen.

• Selection of nearby pages

Nearby pages can be quickly selected with the  key (return one page) and the  key (return one page).

• Return to the Index page

Using the  key, the index page (contents index) can be recalled without digiting the figures.

• Inserting the TV image

During the teletext mode, there is the possibility of switching to the TV image while the system searches a selected page. In this even, press the  key. Once the page has been found, the page will be visualized on the left side of the screen. Press the  key to return to the teletext mode.

Double size text

Press the  key. Now, the upper half of the text will be doubled in size. Press the same key again to double the lower half of the text and press it a third time to return the text to its normal size.

Stopping the automatic change of the page

If a page of teletext is composed of several subpages, the change of the page can be avoided in the subsequent manner: press the  key. The symbol  will be visualized in the upper left corner of the screen. If you press the key twice, the inferior pages will be substituted again.

Recalling the subpages

A subpage can be recalled directly. Select the page with the subpages. Press the  key. Use the number keys to select the desired subpage consisting of four figures (e.g. digit 0001). If there is a subpage present, it will be visualized on the screen.

Recalling a programmed page

(Selecting a teletext page in a particular moment)

- 1) Select the teletext page with a time code (not accessible for all teletext services).
 - 2) Press the  key.
 - 3) Digit the four figures of the desired time using the number keys (e.g. 2030). Press the  key to return to the TV program. At the selected time, the number of the page will be visualized on the screen in the upper left corner and the page can be recalled with the  key.
- If the programming is to be cancelled, recall the page again and press the  key.

Visualizing hidden information (e.g. for quiz games)

Press the  key. Press the key again, to cancel the hidden information.

SECTION 2 DISASSEMBLY

KV-D3431D
RM-811

2-1. REAR COVER REMOVAL

2-2. J BOARD REMOVAL

2-3. CHASSIS ASSY REMOVAL

2-4. A BOARD REMOVAL

2-5. P,B AND V BOARDS REMOVAL

2-6. SERVICE POSITION

* Remove the connector bracket and then perform the following servicing.
(refer to 2-2. CHASSIS ASSY REMOVAL)

2-7. PICTURE TUBE REMOVAL

• REMOVAL OF ANODE-CAP

• REMOVING PROCEDURES

① Turn up one side of the rubber cap in the direction indicated by the arrow ①.

② Using a thumb pull up the rubber cap firmly in the direction indicated by the arrow ②.

③ When one side of the rubber cap is separated from the anode button, the anode-cap can be removed by turning up the rubber cap and pulling up it in the direction of the arrow ③.

• HOW TO HANDLE AN ANODE-CAP

- ① Don't hurt the surface of anode-caps with sharp shaped material!
- ② Don't press the rubber hardly not to hurt inside of anode-caps!
A material fitting called as shatter-hook terminal is built in the rubber.
- ③ Don't turn the foot of rubber over hardly!
The shatter-hook terminal will stick out or hurt the rubber.

SECTION 3

SET-UP ADJUSTMENTS

- When complete readjustment is necessary or a new picture tube is installed, carry out the following adjustments.
 - Unless there is specific instruction to the contrary, carry out these adjustments with the rated power supply.
 - Unless there is specific instruction to the contrary, set the controls and switches this way :
 - Contrast 80%
(or remote control normal)
 - ☼ Brightness 50%
 - Carry out the following adjustments in this order:
 1. Beam landing
 2. Convergence
 3. Focus
 4. White balance
- Note :** Testing equipment required
1. Color bar/pattern generator
 2. Degausser
 3. DC power supply
 4. Digital multimeter
 5. Oscilloscope

Preparations :

- In order to reduce the influence of geomagnetism on the set's picture tube face it east or west.
- Switch on the set's power and degauss with the degausser.

3-1. BEAM LANDING

1. Input the white signal with the pattern generator.
Contrast } normal
Brightness }
2. Position neck ass'y as shown in Fig 3-2.
3. Set the pattern generator raster signal to red.
4. Move the deflection yoke to the rear and adjust with the purity control so that the red is at the center and the blue and the green take up equally sized areas on each side.
(See Figures 3-1 through 3-3.)
5. Move the deflection yoke forward and adjust so that entire screen is red. (See Figure 3-1.)
6. Switch the raster signal to blue, then to green and verify the condition.
7. When the position of the deflection yoke has been decided, fasten the deflection yoke with the screws.
8. If the beam does not land correctly in all the corners, use a magnet to adjust it.
(See Figure 3-4.)

Fig. 3-1

Fig. 3-2

Fig. 3-3

Fig. 3-4

3-2. CONVERGENCE

Preparations :

- Before starting this adjustment, adjust the focus, horizontal size, and vertical size.
- Minimize the brightness setting.
- Provide dot pattern.

(1) Horizontal and vertical static convergence

1. (Moving horizontally), adjust the H.STAT control so that the red, green, and blue points are on top of each other at the center of the screen.
2. (Moving vertically), adjust the V.STAT magnet so that the red, green, and blue points are on top of each other at the center of the screen.
3. If the H.STAT variable resistor cannot bring the red, green, and blue points together at the center of the screen, adjust the horizontal convergence with the H.STAT variable resistor and the V. STAT magnet in the manner given below. (In this case, the H.STAT variable resistor and the V.STAT magnet influence each other)

- Tilt the V.STAT magnet and adjust the static convergence by opening or closing the V.STAT magnet.

4. If the V.STAT magnet is moved in the direction of the ① and ② arrows, the red, green, and blue points move as shown below.

● Operation of BMC (Hexapole) Magnet

- The respective dot positions resulting from moving of each magnet interact so be sure to perform adjustment while tracking.
Use the H.STAT VR to adjust the red, green, and blue dots so they coincide at the center of screen (by moving the dots in the horizontal direction)

(2) Dynamic Convergence Adjustment

1. Adjust the Y.CROSS (RV1705) and Y.BOW (RV1702), so that RED and BLUE shown in Fig. 3-6 will become $a=b=c$.

Fig. 3-6

2. Match the horizontal convergence at the center of the screen with H STAT VR.
3. Adjust the CORNER BOW (RV1703), so that RED and BLUE shown in Fig. 3-7 will become $a=b=c$ and $d=c=f$.

Note: At this point, if the proper relationship between $a=c$ or $d=f$ is not established, adjust the Y.CROSS (RV1705) again.

Fig. 3-7

4. Match the horizontal convergence at the center of the screen with the H STAT VR.
5. Adjust the H TILT (RV1701) so that the RED and BLUE shown in Fig. 3-8 will become $a=b$.

Fig. 3-8

6. Adjust the H AMP (RV1704) so that the RED and BLUE shown in Fig. 3-9 will become $b=c$

Fig. 3-9

7. Match the horizontal convergence at the center of the screen with the H STAT VR.
8. When the H AMP is adjusted repeat the procedures described in Steps (5) to (7).
9. If divergence of the convergence exists at the corner of the screen, the adjustments described in Steps after (3) should be repeated.

(3) Screen corner convergence

Install the permalloy assembly for the section with faulty.

Permalloy

3-3. FOCUS

Adjust the focus to optimize the screen.

3-4. WHITE BALANCE

Screen G2 setting

1. Input the dot signal from the pattern generator.
2. Set the picture brightness control to its minimum level.
3. Apply 180VDC to the R, G, and B cathodes with an external power supply.
4. While watching the picture, adjust G2 control RV701 (Screen) to the point just before the return lines disappear.

White balance adjustment

1. Input an all-white signal from the pattern generator.
2. Set the picture brightness and color controls to their normal levels.
3. Use the RV704 (B Drive) and RV703 (G Drive) to adjust white balance.

In the adjustments below, have the picture color and brightness settings at their normal levels unless there is a specific instruction to the contrary.

SECTION 4 CIRCUIT ADJUSTMENTS

4-1. A BOARD ADJUSTMENT

TUNER AGC ADJUSTMENT (IFG 389S)

1. Tune in an off-air signal.
2. Adjust AGC VR (IFG389S) so that snow noise and cross modulation just disappear from the picture.

IFG5.5S SIF

IFG5.5S SIF -component side-

STEREO SEPARATION ADJUSTMENT (RV1)

1. Input stereo signals. (L-CH 400Hz, R-CH 1KHz)
2. Check the stereo indicator.
3. Connect an oscilloscope to pin ⑧ (CH1) of CN1 through a band pass filter of 1KHz
4. Adjust RV1 so that 1KHz voltage goes down to the minimum.

H FREQ (RV2)

1. Input a PAL COLOR BAR signal, then connect a jumper between pin ⑫ IC4 and GND.
2. Connect a frequency counter to pin ④ IFG5.5S (HP) of CN1 through a probe of 10 : 1.
3. Adjust RV2 (H.FREQ) $15.625 \pm 50\text{Hz}$.
4. After adjustment, remove the jumper.

4-2. B BOARD ADJUSTMENTS

REF OSC NTSC 3.58 MHz Adjustment (CT301)

1. Input an NTSC 3.58 MHz COLOR BAR pattern.
2. Short circuit between pin ⑰ of IC301 and ground.
3. Adjust CT301 to get the slowest picture movement.
4. Remove the jumper wire from IC301.

REF OSC Adjustment NTSC 4.43 MHz Adjustment (CT302)

1. Input an NTSC 4.43 MHz COLOR BAR pattern.
2. Short circuit between pin ⑰ of IC301 and ground.
3. Adjust CT302 to get the slowest picture movement.
4. Remove the jumper wire from IC301.

BELL FILTER ADJUSTMENT (L313)

1. Input a SECAM color bar signal.
2. Connect the oscilloscope to the emitter of Q344.
3. Adjust L313 so that the waveform is flat.

**DISCRIMINATION ADJUSTMENT
(RV301 and L303)**

1. Input a SECAM color bar signal.
2. Connect the oscilloscope to pin ① of IC304.
3. Adjust RV301 until the white and black sections of the waveform at pin ① are at the 0 level.
Connect the oscilloscope to pin ③ of IC304.
4. Adjust L303 until the white and black sections of
5. the waveform at pin ③ are at the 0 level.

**4.25 TRAP Adjustment (L308)**

1. Input SECAM COLOR BAR pattern.
2. Connect an oscilloscope to the Q339 emitter.
3. Adjust L308 so that the 4.25 MHz waveform is minimum.

4.23 TRAP ADJUSTMENT(L312)

1. Input SECAM COLOR BAR pattern.
2. Connect an oscilloscope to the Q339 emitter.
3. Adjust L312 so that the 4.43 MHz waveform is minimum.

4-3. D BOARD ADJUSTMENTS**H.PHASE ADJUSTMENT (RV502)**

1. Input a PAL color bar signal.
2. Set the picture and brightness controls to their normal levels.
3. Set RV1508 (H.CENT) to its mechanical center.
4. Connect the oscilloscope to pin ⑪ (SCP) of IC 501.
5. Rotate RV502 to adjust to $4.9 \pm 0.1 \mu s$.

RV1508
H. CENT (HORIZONTAL CENTER)

RV1504
H. SIZE (HORIZONTAL SIZE)

RV1506
V. CENT (VERTICAL CENTER)

RV1507
V. SIZE (VERTICAL SIZE)

RV1509
V. ANGLE (VERTICAL ANGLE)

RV1503
PIN AMP (PINCUSHION AMPLIFIER)

RV1502
PIN PHASE (PINCUSHION PHASE)

RV1501
PIN. COR (PINCUSHION CORRECT)

RV1505
CORNER. COR (CORNER CORRECT)

4-4. P BOARD ADJUSTMENTS

TUNER AGC ADJUSTMENT (RV01)

1. Tune in an off-arr signal.
2. Adjust AGC RV01 so that snow noise and cross-modulation just disappear from the picture.

4-5. V BOARD ADJUSTMENTS

CLOCK ADJUSTMENT (CT1)

1. Remove the CNV41 connector pin ③.
2. Put the system into text mode.
3. Adjust CT1 so that the picture does not move.

PIC LEVEL ADJUSTMENT (RV1)

1. Maximize the picture setting.
2. Adjust RV1 so that the RGB output is 0.75V.

MEMO

Handwritten notes area with horizontal lines for recording.

5-2. CIRCUIT BOARDS LOCATION

Note: The components identified by shading and mark  are critical for safety. Replace only with part number specified.

- Note :
- All capacitors are in μF unless otherwise noted.
 $\text{pF} : \mu\text{F} \quad 50\text{WV}$ or less are not indicated except for electrolytics.
 - Indication of resistance, which does not have one for rating electrical power, is as follows.

Pitch : 5mm
Rating electrical power : 1/4W

- Chip resistor is in 1/10W.
- All resistors are in ohms. $\text{k}\Omega = 1000\Omega$, $\text{M}\Omega = 1000\text{k}\Omega$
-  : nonflammable resistor.
-  : fusible resistor.
-  : internal component.
-  : panel designation and adjustment for repair.
- All variable and adjustable resistors have characteristic curve B, unless otherwise noted.
- All voltages are in V.
- Readings are taken with a $10\text{M}\Omega$ digital multimeter.
- Readings are taken with a color-bar signal input.
- Voltage variations may be noted due to normal production tolerances.
-  : B+ line.
-  : signal path

TUNER, [SIF, VIF]

[illegible]

This schematic diagram illustrates the internal electronic layout of the Sony H2-92 camera. It features a top-down view of the camera body with various components labeled with part numbers and location codes. Key components include:

- IC951:** A large integrated circuit located on the left side of the camera body.
- D954, D953, D952, D951:** Diodes positioned along the top edge of the camera.
- H2:** The main camera body, labeled with a large 'H' and '2'.
- SONY:** The manufacturer's name, centered below the camera body.
- H2-92:** The camera model name, located on the right side.
- R951:** A component located at the bottom right of the camera body.
- LEDA SUR:** A label for a component on the right side.
- CAPI:** A component located at the top right corner.
- GPS RES LER SUR:** A label for a component on the right side.
- STARS:** A label for a component on the right side.

 The diagram also includes a small inset box on the left side of the camera body, labeled with the number '2'.

SECTION 6
EXPLODED VIEWS

NOTE:

- Items with no part number and no description are not stocked because they are seldom required for routine service.
- The construction parts of an assembled part are indicated with a collation number in the remark column.
- Items marked "★" are not stocked since they are seldom required for routine service. Some delay should be anticipated when ordering these items.

The components identified by shading and mark Δ are critical for safety.
Replace only with part number specified.

SECTION 7 ELECTRICAL PARTS LIST

KV-D3431D
RM-811

B

NOTE:

The components identified by shading and mark  are critical for safety. Replace only with part number specified.

• Items marked " * " are not stocked since they are seldom required for routine service. Some delay should be anticipated when ordering these items.

• All variable and adjustable resistors have characteristic curve B, unless otherwise noted.

RESISTORS

• All resistors are in ohms
• F : nonflammable

When indicating parts by reference number, please include the board name.

CAPACITORS

• MF : μ F, PF : μ F

COILS

• MMH : mH, UH : μ H

RM-811

SPECIFICATIONS

Remote control system	infrared control
Power requirements	3 V dc 2 batteries IEC designation R 6 (size AA)
Dimensions	Approx. 98×36×171.1 mm
Weight	Approx. 225 g (8 oz) including batteries

Design and specifications subject to change without notice.

REMOTE COMMANDER
SONY®

EXPLODED VIEW

NOTE:

- Items with no part number and no description are not stocked because they are seldom required for routine service.
- The construction parts of an assembled part are indicated with a collation number in the remark column.
- Items marked "★" are not stocked since they are seldom required for routine service. Some delay should be anticipated when ordering these items.
